

Approved Contractor, Installer and Supplier Scheme (Chain of Supply)

‘A scheme that provides a property owner with peace of mind’

After extensive testing and sourcing of bituminous waterproofing membranes and insulation products manufactured by numerous leading manufactures throughout Europe and beyond. To ensure that the products installed on to a property’s roof are done so not only in accordance with the product manufacturers instructions, but are done so having followed a proven Chain of Supply (commonly known in the construction industry as chain of custody); *from: - Manufacturer: - to Manufacturer’s appointed Agent: - to Supplier: - to Installing Contractor: - to the employees of the Installing Contractor: - to property owner*, thereby ensuring that when installed on to a properties roof, the products are as pristine as the day they were made. EDS Roofing Supplies are proud to be a link in this chain.

The benefits of employing a Chain of Supply for a property owner can include when and where necessary: -

- Pre-contract meetings
- Site inspections undertaken by employees of EDS Roofing Supplies (Midlands) Limited
- Reporting procedures
- Sign-off inspections
- Review meetings
- Prompt and professional response to technical issues on site
- Comprehensive guarantees
- The knowledge that from point of manufacture to installation on to a property’s roof, a product is fully traceable

To ensure this chain of supply is maintained, on behalf of those manufacturers that EDS Roofing Supplies partner in the UK as their appointed agent, the **JIGSAW** Approved Contractor, Installer and Supplier Scheme is operated in the UK by EDS Roofing Supplies. This scheme incorporates the following: -

Approved Contractors: These are roofing contractors (large and small) who have been vetted by EDS Roofing Supplies as being a company suitable to participate in the scheme. Professional enough to be able to undertake roofing works to both exceptional standards of workmanship and organisation, whilst always being ready to be a first point of call for any property owner in times of need.

Approved Installers: These are individuals employed by roofing contractors (large and small) to undertake the most important task in the Chain of Supply, i.e. to actually install the products on to a property’s roof. Approved Installers are vetted by EDS Roofing Supplies to ensure they are both practically efficient in all aspects of installing the products and responsible for their endeavours.

Approved Suppliers: These are roofing merchants who have been vetted by EDS Roofing Supplies to ensure they are suitable to participate in the scheme. Their whole emphasis is on providing products they are not only proud to be associated with but are also keen to embrace with on behalf of their customers. Understanding the requirements for Chain of Supply, these are merchants who are committed professionals on all fronts.

In addition to being able to offer property owners a manufacture’s insurance guarantee* following the successful completion and installation on to a properties roof of those manufacturer’s products who EDS Roofing Supplies partner in the UK as their appointed agent, all Approved Contractors and Suppliers are automatically entered in the **JIGSAW** guarantee scheme and able to provide **JIGSAW** guarantees as and when necessary.

*All Approved Contractors, Installers and Suppliers are issued with Certification to prove their status as being part of the **JIGSAW** Approved Scheme, and are vetted on a continual basis to ensure their attainment in the scheme.*

If you wish to become part of the **JIGSAW** Approved Contractor, Installer, and Supplier Scheme in the UK please contact: -
